

# Acesso ssh via tor

Primeiro, instalamos tor e o connect-proxy:

```
sudo apt install tor connect-proxy
```

Depois, configuramos o arquivo `~/.ssh/config` para usar o proxy:

```
Host *
```

```
CheckHostIP no
```

```
Compression yes
```

```
Protocol 2
```

```
ProxyCommand connect -4 -S localhost:9050 $(tor-resolve %h localhost:9050) %p
```

Por fim, conectamos no ssh:

```
ssh user@server
```

Se der a mensagem de erro `ERROR: You must specify the destination port correctly.`, então precisa usar o ip do servidor, ao invés do hostname.
