

Git

Várias coisas de git:

Voltar todo o repositório para um determinado commit:

```
git reset --hard <commit>
```

(fonte: <https://superuser.com/a/795447/3154979>)

Voltar um commit temporariamente:

```
git checkout X (go back in time)
```

```
<make changes and build>
```

```
git checkout . (throw away changes)
```

```
git checkout master (go forward to "now")
```

(fonte: <https://www.reddit.com/r/git/comments/gok5g1/comment/frg9o0s/>)

Listando arquivos modificados em um commit:

```
git diff-tree --no-commit-id --name-only -r bd61ad98
```

Revision #2
