

Lendo arquivos de uma pasta com php

Sempre esqueço.

```
$pasta = __DIR__.'./pasta/processar';
$iterator = new DirectoryIterator($pasta);

foreach ( $iterator as $entry ) {
    if($entry->isFile ()) {
        $file_extension = pathinfo($entry->getFilename(), PATHINFO_EXTENSION);
        if($file_extension == 'log') {
            $arquivos[] = $entry->getPathname();
        }
    }
}
```
