

# Removendo um ip do Fail2ban

1) Listar os ips bloqueados:

```
iptables -L -n
```

2) Listar os nomes das regras do fail2ban:

```
fail2ban-client status | grep "Jail list" | sed -E 's/^[^:]+:[ \t]+//' | sed 's/,//g'
```

3) Desbloquear o ip, informando também o nome da regra:

```
fail2ban-client set REGRA unbanip ENDERECO
```

exemplo:

```
fail2ban-client set sshd unbanip 186.204.26.11
```
