

# Validando datas em pt-br com jQuery Validate

Assim:

```
$.validator.addMethod(
  "date",
  function(value, element) {
    var check = false;
    var re = /^\\d{1,2}\\\\d{1,2}\\\\d{4}$/;
    if( re.test(value)){
      var adata = value.split('/');
      var gg = parseInt(adata[0],10);
      var mm = parseInt(adata[1],10);
      var aaaa = parseInt(adata[2],10);
      var xdata = new Date(aaaa,mm-1,gg);
      if ( ( xdata.getFullYear() == aaaa ) && ( xdata.getMonth () == mm - 1 ) && ( xdata.getDate() == gg ) )
        check = true;
      else
        check = false;
    } else
      check = false;
    return this.optional(element) || check;
  },
  "Insira uma data válida"
);
```
